

# sears Cooktop: Measurement Cheat Sheet

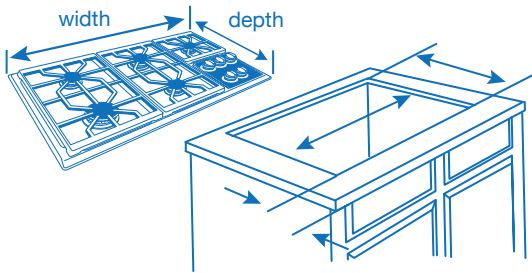

Use this as a guide to make sure the appliance you want fits in the space you have available.

**1** Measure the narrowest doorway or hallway from outside the home to the location where the appliance will be installed.

Width of narrowest doorway in inches:  inches

- Appliance depth OR width must be smaller than the width above.
- Most home doors can be removed if necessary.

**2** Measure the opening where the appliance will go.

Enter space measurements

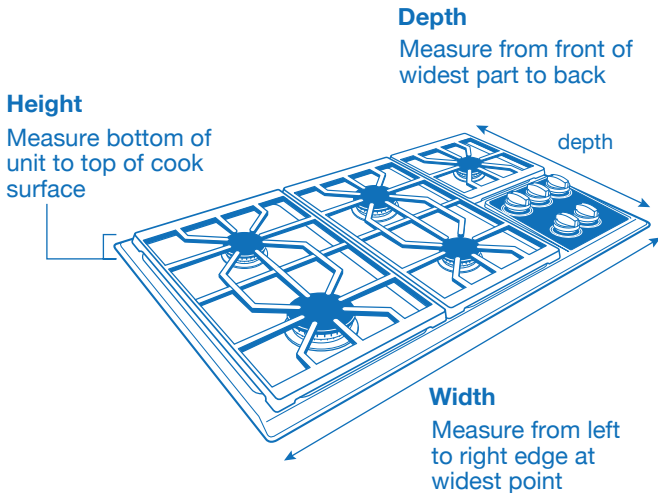

width  inches

depth  inches

height  inches

**3** Verify the appliances you're considering to fit within the measurements you took in step 2.

- Cooktops fit into cabinet cut-outs and are flush to cabinet front.
